

# E-Safety

## Key Vocabulary

|                      |                                                                                                                                                                          |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Cyber bully          | Intimidating or threatening someone online.                                                                                                                              |
| Password             | A secret word that only you know. It might have jumbled up numbers and letters, to make it hard for someone to guess. Having a secret password means only you can login. |
| Personal Information | Information that could be used to identify someone.                                                                                                                      |
| Private              | Sharing something with only a small trusted group of people.                                                                                                             |
| Netiquette           | Being polite online (etiquette on the net)                                                                                                                               |

Even if you can't see someone, things you write might still upset them.

Being unkind to someone online is a form of bullying.

If anyone is nasty to you online you must tell a grown up so they can help.
